BACKGROUND INFO:

We hope you will listen in or be a part of the raddest college radio station in the land.

Lake Effect Radio is a student run radio station at Lakeland Community College. Our DJs plan, produce, advertise, and host their own one hour or two-hour radio show (s). The content of their show is entirely up to them, if they have a central idea to base it around. Most DJs choose to have their shows centered on music, but we also have talk-based shows as well. We also announce campus events and programs sponsored by the many clubs at Lakeland. Lake Effect Radio's goal would be to entertain the students that are in Breakers in between classes. Some of our DJs run shows with at least one partner. If you would like to be joined on your show by a cohost, include that on your application and attend a training session together! We encourage all our DJs to think big, and ask them to seek interviews, in-studio guests, and/or live music if it fits with their shows. We also want DJs to be at least periodically involved with station activities and event.
